

## **ConnectionsIT Creates Video Surveillance Solution for \$195 Million Creek Casino**

### **Creek Nation Casino Security System Integrates Over 1,400 IP High-Definition Cameras and Advanced Network Management Solution to Protect Guests, Facilities and Assets**

**Tulsa, Oklahoma - May 26, 2009** – ConnectionsIT, one of the most respected Indian Nation gaming security system integrator, is celebrating the successful opening of the \$195 Million River Sprit Casino in Tulsa, Oklahoma, which is owned and operated by the Muscogee Creek Nation. ConnectionsIT played a major role in the overall design and installation of the casino's new state-of-the-art video surveillance system.

ConnectionsIT delivered top tier security product manufactures such as Axis Communications, Genetec, IQinVision, and Pivot3 to provide the various components that make-up the River Sprit video surveillance solution. The casino hosts some 1,400 IP cameras, which is the largest installation of IP cameras at any casino in the world. The River Sprit also incorporated a virtual matrix and clustered storage solution that provides over 1.5 petabytes of storage and reduces the need for duplicate servers.

The River Sprit Casino, which officially opened on March 30, 2009, includes one of Oklahoma's largest casino floors, with over 300,000 square-feet of gaming space. The casino features 2,800 high-tech machines, 24 table games, 15 poker tables, four dining venues and the uniquely designed Mystic River Lounge.

The video surveillance solution is incorporated into the overall casino security system to provide live video at all gaming stations, casino tables, money exchanging areas, and all of the public dining and lounge areas, as well. The system is designed to provide continuous monitoring and observation opportunities throughout the casino and public areas. The solution offers complete PTZ capabilities, as well as the ability to detect pre-programmed events and immediately notify security officials.

"The video surveillance solution provided by ConnectionsIT is an open system architecture that will allow for easy expansion and future growth," said Jason Nichols, gaming commissioner for the Creek Nation. "Our goal was to incorporate the latest security technology into our surveillance system and to create a one-of-a-kind system that is both cost effective and easy to operate."

As a leading security system integrator, ConnectionsIT works with all types of security product and service companies to create the right solution that custom fits the needs of a particular casino environment. ConnectionsIT has a long and impressive history of working with Native American casinos such as the Comanche, Muscogee Creek, Choctaw, Paiute, and several Pomo Bands to incorporate the industry's best product providers into solutions that deliver results.

“The Creek River Sprit Casino offered a variety of design and installation challenges that we were able to handle thanks to my solution partners,” said Brody Carlson, President of ConnectionsIT. This is the largest casino project that Connections IT has completed to date and we are proud of the results and overall system performance.”

#### **About ConnectionsIT**

As a leading security system integrator, ConnectionsIT works with all types of security product and service companies to create the right solution that custom fits the needs of a particular casino environment. ConnectionsIT has a long and impressive history of working with Native American casinos such as the Comanche, Muscogee Creek, Choctaw, Paiute, and several Pomo Bands to incorporate the industry’s best product providers into solutions that deliver results. #### **About Genetec**

Genetec, incorporated in 1997, is recognized as a pioneer in IP security solutions and a technology leader within the physical security industry. With headquarters in Montreal and offices in Europe, the Middle East, Japan, Southeast Asia, and the United States, Genetec provides a complete line of innovative IP security products. We develop software solutions to address three main applications: access control, video surveillance, and license plate recognition. Our success is built on our team of highly skilled individuals dedicated to the development of tomorrow's cutting edge security technologies and our commitment to customer care. For more information, visit [www.genetec.com](http://www.genetec.com).

#### **About Axis Communications**

Axis is an IT company offering network video solutions for professional installations. The company is the global market leader in network video, driving the ongoing shift from analog to digital video surveillance. Axis products and solutions focus on security surveillance and remote monitoring, and are based on innovative, open technology platforms. Axis is a Swedish-based company, operating worldwide with offices in more than 20 countries and cooperating with partners in more than 70 countries. Founded in 1984, Axis is listed on the NASDAQ OMX Stockholm, under the ticker AXIS. For more information about Axis, please visit our website at [www.axis.com](http://www.axis.com).

#### **About IQinVision**

IQinVision is the world leader in megapixel IP video. Since 1998, IQinVision has been designing, manufacturing, and marketing the IQeye family of high-performance network security cameras, intelligent cameras, and network video recording (NVR) systems. Committed to leading the industry with highly-valued products and customer service, IQinVision was first to market with HDTV and megapixel cameras and has received numerous awards from Frost & Sullivan, ST&D, Detektor, IIPSEC, and others. IQeye network cameras are renowned for image quality, stability, and reliability in the most demanding network conditions and environments. The IQeye acts as a stand-alone NVR or integrates with third-party NVR and video analytics software for enterprise-wide deployments. IQinVision products are available as IQeye-brand, private-labeled, or OEM models, and have been widely deployed in city center, property management, education, retail, casino, government, transportation, and a number of other vertical market applications. IQinVision is a privately-held corporation headquartered in San Juan Capistrano, California with regional offices in Lancaster, Pennsylvania and Utrecht, Netherlands. For more information: [www.iqeye.com](http://www.iqeye.com)

#### **About Pivot3**

Pivot3 is the fastest-growing surveillance storage company, with its award-winning products widely deployed in the gaming, homeland security, public safety, education and transportation markets. The company’s innovative RAIGE® architecture is ideally suited for video applications, and offers advanced availability, massive bandwidth, and large scaling of capacity supported by an intuitive interface for ease of use. The Pivot3 core product lines are the RAIGE Array™, a clustered iSCSI SAN, and Serverless Computing™, the industry’s first combined NVR/SAN product, which consolidates NVR servers into the IP SAN platform for concrete cost, power and cooling savings.
