

Paiute Palace Casino Moves to All IP Camera System as Part of ConnectionsIT Security Video Surveillance Upgrade Solution

Bishop, California, July 14, 2009 – ConnectionsIT, one of the most respected Indian Nation gaming security system integrators, is working with the Paiute Palace Casino in Bishop, California to move all of the casinos 150 analog cameras to a full IP AXIS H264 camera and Axis PTZ solution. This casino will receive the latest image clarity without having to change out its existing servers and storage equipment. ConnectionsIT worked with Genetec to deliver this improved surveillance solution.

The casino operates a variety of gaming tables and video games, and needed to make sure that it was providing the latest in IP video surveillance technologies to protect its assets, guests and employees. IP surveillance allows for additional flexibility in the amount of video that can be recorded and stored to meet local gaming commission regulations. It also provides the opportunity to introduce new management software programs into the security network to save additional operating dollars.

The Paiute people are the fifth largest California Tribe, with 2,000 members and one of the smallest land bases. The Paiute people who live on the Bishop Paiute Reservation are descendants of the "Nu-Mu", the original people of the Owens Valley. The Paiute Casino was established in October of 1995 in a small temporary building and in April of 1996 the new existing casino opened its doors. The casino is over 65 percent employed by Paiute people. www.paiutepalace.com

ConnectionsIT works with all types of security product and service companies to create the right solution that custom fits the needs of a particular casino environment. ConnectionsIT has a long and impressive history of working with Native American casinos such as the Comanche, Muscogee Creek, Choctaw, Paiute, and several Pomo Bands to incorporate the industry's best product providers into solutions that deliver results.

"We are very pleased to be working with our long-term customer the Paiute Nation in helping them to upgrade their surveillance camera system to an all IP solution," said Brody Carlson, President of ConnectionsIT. "We are encouraging many of our casino customers to upgrade their surveillance systems to IP cameras, while utilizing their existing security equipment. It also allows for the integration of advanced managed system software to expand operating options and costs savings."

About ConnectionsIT

ConnectionsIT works with all types of tier-one alarm, access control and video surveillance product and service companies to create the right security solution for a particular casino environment. ConnectionsIT has offices in California, Nevada and Oklahoma, and has successfully handled casino video surveillance system upgrades and expansions, as well as totally new system designs and installs.
